## **SATAIR AND SENIOR METAL BELLOWS EXTEND A SUCCESSFUL PARTNERSHIP**

Satair and Senior Metal Bellows, signed a new distribution agreement, which is an extension to an existing agreement signed in 2017. The new agreement covers the aftermarket for Europe and Asia and all commercial aerospace aftermarket products of Senior Metal Bellows, including compressors, bellows, thermal valves, accumulators, feedthroughs and much more.

Mr Steen Karsbo, VP and Head of Business Development of Satair states: “We see this extension as a strong token of trust from SMB’s side, and a testimony towards a continued strong relationship between our two companies. We are looking forward to support SMB in additional territories and for the full scope of products”

Mr. John Cory, CEO of Senior Metal Bellows adds: “We are excited to continue our relationship with Satair.” The extended agreement, which has taken effect, is exclusive in Europe, Africa, South America and Asia (non-exclusive in China). The agreement does not cover North America, which will continue to be handled directly by Senior Metal Bellows.

---

## About Satair

Satair is a truly global company and world leader in the commercial aerospace aftermarket.

The company supports the complete life cycle of the aircraft with a full and integrated portfolio of flexible, value adding material management products, services and tailored support modules across all platforms.

Satair is a global company with 1,300 employees. A key part of the Airbus Customer Services unit, Satair has exclusive or primary distribution arrangements for aerospace component manufacturers, and supplies parts to multi-fleet customer airlines and MRO companies. It also fulfils the material service support obligation for the in-service fleet of more than 7,000 Airbus aircraft.

Satair is a stand-alone company and AIRBUS services company. Visit [www.satair.com](http://www.satair.com).

**About Senior Metal Bellows** For more than 60 years, Senior Metal Bellows (one of 33 operating companies under Senior plc) has been dedicated to providing custom engineered solutions for their client's engineering and manufacturing challenges. By applying advanced engineering and manufacturing capabilities plus precision metal joining, processing, and fabrication they are able to deliver innovative solutions in a timely and cost effective manner. Senior Metal Bellows designed solutions are used in hydraulic/pneumatic systems, pressure and flow control, fuel systems, thermal management, actuation, dynamic sealing, precision sensing and flexible coupling.
